Energy Severn Vale
2 November 2011
Sean Sargent

What is Energy Severn Vale?

- Based on the Energy Island concept in Anglesey
- Sponsored by Prospect, local MPs & NDA
- Bridges the gap for businesses wishing to invest in low carbon energy development
- Gloucestershire & South Gloucestershire

Vision & Objectives

- To develop the Severn Vale as a global centre of excellence for research, development & production of low carbon energy
- To build support from local councils, businesses, trade unions & politicians for new development in the Severn Vale
- To secure a long term skill base for nuclear in the Severn Vale & wider UK economy

Opportunities & Challenges

- Possible new nuclear station at Oldbury (5000 jobs during construction, 650 post construction)
- Skills development (links with local education centres) & employment for skilled workforce
- Investment in low carbon energy
- Strategic collaboration between the key players in the region to promote investment, learning and best practice

Next steps

- Establish an operating framework with local councils & local enterprise partnerships
- Broaden partnerships with developers & the supply chain
- Communicate the clear benefits of investing in the Severn Vale area to national politicians/business
